

Programming

Files

- Read a file
- Write a file
- File options:
 - <https://docs.python.org/3/tutorial/inputoutput.html#reading-and-writing-files>

Examples

dict

- It's not a list:
 - Always a pair of keys and values
 - Keys are always strings
 - Values can be anything (int, str, bool, None, etc.)
 - Unordered
- Defined with { }

Examples
